

# First lecture series of the Lift Forums 2021 in Eltville

**After a long absence, ALGI, Danfoss, DigiPara, Kollmorgen and Meiller were able once again to resume their traditional lecture series, with the kind of personal contact that simply hadn't been possible for many months.**

The two days of lectures took place at ALGI in Eltville. With around 30 people in attendance on each day, both

of them were quickly fully booked. This alone is a clear sign of how much the industry has missed having face to face contact.

Participants included lift manufacturers, specialist planners, and operators. The firms presented their new products as well as other interesting developments. Af-

ter each theoretical presentation, participants had time to view display objects and programs and to ask questions. This also had the effect of maintaining the network and cultivating its sense of community.

The program was rounded off by a tour of the works, followed by dinner for the guests and lecturers, laid on by the hosts, ALGI. The evening meal also provided an opportunity for further conversation and exchanges on the themes covered in the lectures.

Thanks to the interesting and informative lectures and the excellent organization by the host, ALGI, the whole event was a resounding success. Our special thanks go to you, dear visitors and guests, for making this event possible! Thank you.

We would also like to take this opportunity to invite you to our second event in Munich.
